Fear of Mobile security

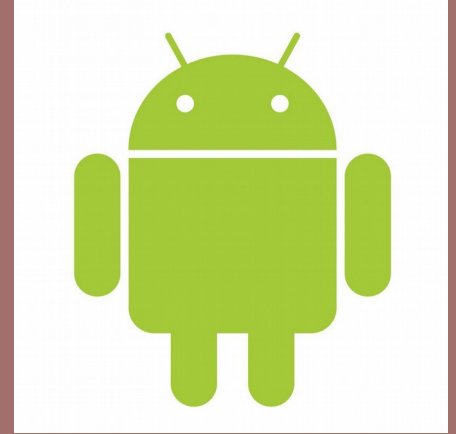

The Faraday Cage

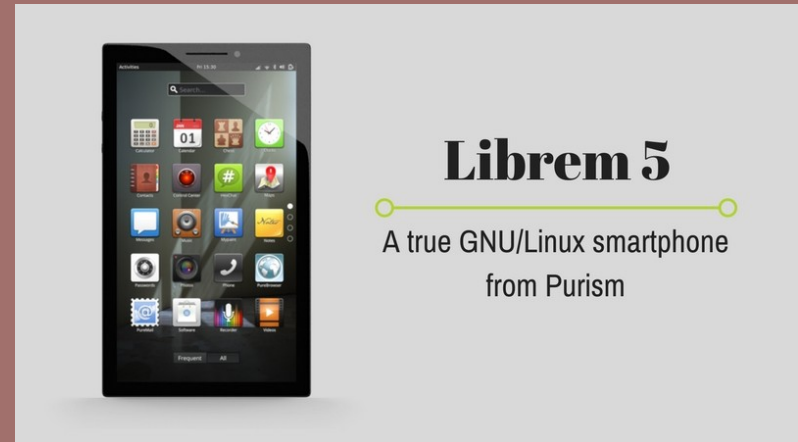

Apple or Android

- Android
 - Many Variants
 - More modifiable
- IOS
 - More user friendly
 - More default protections

Quick OS talk

Universal Applications

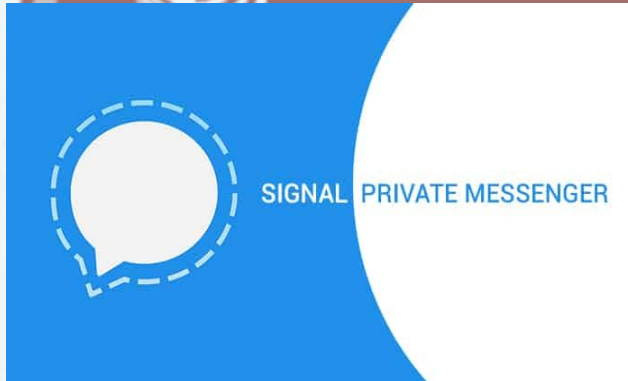

Encrypted cellular replacements

VPNs

Note taking app

2FA

Encrypted Cellular

- Uses WiFi
- Utilizes E2E encryption
 - Call
 - Text
- Stored Locally
- Passwords additions available
- Bonuses
 - Dark themes
 - Better call quality
 - Multiplatform

Wire

2 Factor Authentication

DON'T USE SMS!

Use these instead

(Assuming it needs to be on a phone)

Authy

FreeOTP

Quick note

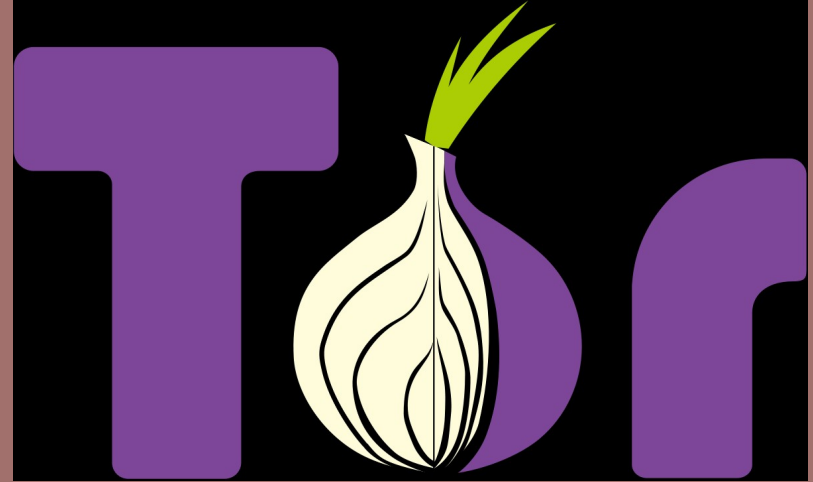

With Standard Notes!

VPNs

privateinternetaccess™
for safe browsing, always use protection.™

ProtonVPN

Secure Internet Anywhere

AND THEN THEY SAID

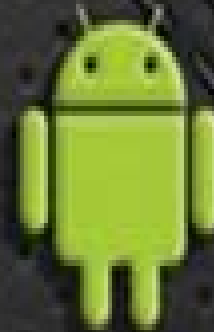

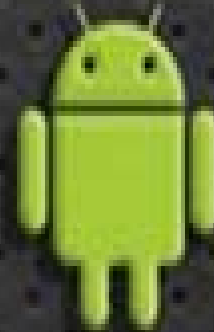

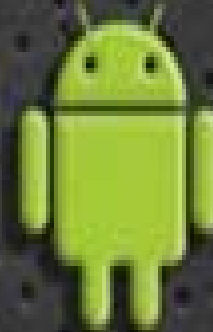

THEY HAD NO LOGS

I fixed it!
